                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     -!- FUNCTION: Cell wall formation.
-!- CATALYTIC ACTIVITY: ATP + UDP-N-acetylmuramoyl + L-alanine = ADP
phosphate + UDP-N-acetylmuramoyl-1.-alanine.
-!- PATHWAY: Peptidoglycan biosynthesis.
-!- SUBCELLULAR LOCATION: Cytoplasmic (Probable).
-!- SIMILARITY: Belongs to the murCDEF family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       PIR, C69662; C6962.

-i - FUNCTION: Cell wall formation.

-i - CATALYTIC ACTIVITY: ATP + UDP-N-acetylmuramoyl + L-alanine = ADP phosphate + UDP-N-acetylmuramoyl-L-alanine.

-i - PATHWAY: Peptidoglycan blosynthesis.

-i - SUNCELLULAR LOCATION: Cytoplasmic (Probable).

-i - SUNLIARITY: Belongs to the murCDEF family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          SEQUENCE FROM N.A.

-!- CATALYTIC ACTIVITY: AIP + UDP-N'acetylmuramoyl + L-alanine = ADP
-!- Dhosphate + UDP-N'acetylmuramoyl-L-alanine.
-!- PATHWAY: Peptidoglycan biosynthesis.
-!- SUBCELLULAR LOCATION: Cytoplasmic (Probable).
-!- SIMILARITY: Belongs to the murCDEF family.

"large-scale genomic rearrangement in invasive strains and new insights
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          4 YHFVGIKGSGMSSLAQIMHDLGHEVQGSDIENYVFTEVALRNKGIKILPFDANNIKEDMV
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  5 YHFIGIKGSGMSALALMLHQMGHKVQGSDVEKYYFTQRGLEQAGITILPFSEDNITPDME
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Genome Res. 13:1042-1055(2003).

-1- FUNCTION: Cell wall formation.

-1- CATALYTIC ACTIVIT: ATP + UDP-N-acetylmuramcyl + L-alanine = ADP-DROSPHARE + UDP-N-acetylmuramcyl-L-alanine.

-1- PATHWAY: Peptidoglycan blosynthesis.

-1- SUBCELLULAR LOCATION: Oytoplasmic (Probable).

-1- SUBCRILULAR LOCATION: Oytoplasmic (Probable).

-1- SIMILARITY: Belongs to the murcDEF family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     2; Gaps

UDP-N-acetylmuramate--L-alanine ligase (EC 6.3.2.8)
MURC OR SPYM3_0252 OR SPS1607.
                                   PATHWAY: Peptidoglycan biosynthesis.
SUBCELLULAR LOCATION: Cytoplasmic (Probable).
SIMILARITY: Belongs to the murCDEF family.
                                                                                                                                                                                                                                                                                                                                                             EMBL; AE006433; AAK06138.1; ALT_INIT.
